Notes:  
Māori figures are series 6 projections based on the 2006 Census and assume medium fertility, medium mortality, medium annual net migration and medium inter-ethnic mobility. Non-Māori figures are derived from national series 5 projections based on the 2006 Census and assume medium fertility, medium mortality and long-term annual net migration of 10,000. The two series are designed to be directly comparable.  
Due to rounding, individual figures in this table do not sum to give the stated totals and may differ slightly from other published figures.
